

**GUM LIFT NG\*** removes gum from tables, chairs, floors and other non-porous surfaces. A refrigerant freezes the gum, which releases the adhesions between the gum and surface.

## DIRECTIONS

Insert the extension tube into the valve tip. Direct the tube at the point of adhesion between the gum and surface. When the tube is within 1 inch of the gum, spray until frost appears. In most cases, the gum will fall off by itself. In stubborn dried on cases, slight prodding with a screwdriver or putty knife may be needed. **GUM LIFT NG\*** leaves no mark or stain on the surface.

CAS Numbers: Contains isobutene/propane blend (75-28-5 and 74-98-6).

## CAUTION

Contents under pressure. Do not puncture or incinerate container. Do not expose to heat or store at temperatures above 120°F.

## FIRST AID

**IF IN EYES:** Flush with water for 15 minutes. If irritated, seek medical attention.

**IF ON SKIN:** Wash with soap and water. If irritated, seek medical attention. If frostbitten, warm skin slowly.

**IF INHALED:** Remove to fresh air. Resuscitate if necessary. Get medical attention. Give oxygen.
