

ODOR-OUT T.D. represents the next evolution in room deodorizers – aromatherapy. This breakthrough formulation contains all of the performance one might expect from a dry-type air freshener – but with a twist. Excellent bloom and suspension time, ultra fine particles, no fall out and no residue for use in textile applications are just some of the attributes. What is truly remarkable about the product is that it achieves the incredibly dry spray without using ozone depleters. In fact, this product contains less than 30% total VOC content.

The real twist for this exciting new formulation is the use of all-natural essential oils to invoke a sensation, an essence and a mood to allow this product to be used in applications well beyond room deodorizing and restroom maintenance. Included is an outstanding fragrance to facilitate a physiological reaction by utilizing various essential oils designed to stimulate, uplift, relieve stress, or relax simply from the olfactory notes and tones. But a fantastic fragrance is not only the premium feature you will find. Also included is not one, but two odor counteractants for maximum deodorizing power. The dual system quickly neutralizes smoke, decay, urine, feces, solvent, vomit, cooking, animal and more.

The metered valve delivers precise spray volumes in an ultra fine mist to effectively freshen rooms up to 6,000 cubic feet. Although versatile enough to use virtually anywhere, traditional uses include freshening bath and washrooms, showers and garbage receptacle areas, in hotels, restaurants, hospitals, apartments, schools, nurseries, fitness centers, commercial and institutional buildings, animal clinics, nursing homes and more. Aromatherapy uses include lobbies, waiting rooms, hallways, meeting rooms, retail shops, theaters, offices, conference rooms, and other areas where establishing a mood in the setting is desired. Casinos, nightclubs and other entertainment establishments are IDEAL!

DIRECTIONS

Open the cabinet door and remove the used can, if the machine has been previously used. With the valve opening pointed towards you, place the new can in the cabinet and snap in place. Step to one side, turn the control switch to the "ON" position and push the switch to test operation. This can contains 3,400 controlled sprays for use in closed areas. This can will last for 30 days when used on a 24-hour basis, or 60 days if used 12 hours per day when set to dispense every 15 minutes.
