

GUIDE FTG is a lubricating, waterproofing and rustproofing agent for indoor and outdoor applications. Made especially for use on food and textile processing equipment and containers. Used to eliminate minor squeaks. **GUIDE FTG** can be safely used on food handling equipment. Stays within FDA guidelines allowing no more than 10 PPM to be imparted to food. Helps fight rust on all types of molds and dyes and keeps materials from sticking to heat sealing equipment. Dry lubricant, release agent – heat stable with rust inhibitor. Temperature range works from -58°F to +575°F. Excellent for conveyors, slicing machines, grinders, cooking coils, mixers, hand equipment, saws, packaging, etc.

DIRECTIONS

Shake well before using. Make sure surface is clean and dry. Spray lightly with sweeping motion. Work object back and forth until it glides effortlessly. Repeat as needed.

CAUTION

Do not puncture or incinerate container. Do not expose to heat or store at temperatures above 120°F.

FIRST AID

IF IN EYES: Immediately flush with large quantities of water for at least 15 minutes, lifting upper and lower eyelids occasionally. Seek medical attention.

IF ON SKIN: Immediately flush exposed area with water for at least 15 minutes. If irritation persists, get medical attention. Remove contaminated clothing and laundry before reuse.

IF INHALED: Remove person to fresh air. If irritation persists, give oxygen, get medical attention.

IF SWALLOWED: DO NOT induce vomiting. Seek medical attention immediately. Note: Never give anything by mouth to an unconscious or convulsing victim. Keep person warm and quiet.
