## **TECHNICAL DATA SHEET**

### **ADENA 9900**

#### **Product #AD9900**

#### **INHIBITED SULFAMIC ACID**

ADENA 9900 is a powdered sulfamic acid blend with corrosion inhibitors and wetting agents designed for cleaning heat transfer surfaces. Additionally, it protects galvanized metal surfaces during cleaning.

#### **Uses:**

ADENA 9900 is used as a descaler when the surfaces to be cleaned are galvanized. ADENA 9900 is inhibited to protect galvanized metal surfaces from corrosion during the cleaning process. ADENA 9900 can be used to clean a cooling water system while in operation. Optimum results are obtained when cooling water is heated to 95°F or above.

#### **Product Description:**

Physical State.....Powder  
Color.....off-white  
pH.....1.3

#### **Dosage:**

For cleaning, maintain between a 5 to 10% solution or 40 to 80 pounds of ADENA 9900 per 100 gallons of water in the system. For additional information on product application, contact your ADENA TECHNOLOGIES representative.

#### **Handling:**

ADENA 9900 and its solutions are strongly acidic. Do not take internally. Avoid skin and eye contact. Should contact occur, immediately flush with large amounts of water. If any discomfort persists, seek medical attention. Read relevant Material Safety Data Sheet before handling this product.

#### **Packaging:**

ADENA 9900 is packaged in 400 lb. and 50 lb. non-returnable containers.
