

MEGAPOWER is specially formulated for hard to clean institutional ovens, grills and utensils. **MEGAPOWER** will cling to vertical surfaces giving the product additional time to penetrate and emulsify carbonized cooking soils, simplifying clean-up. Unlike standard oven cleaners, **MEGAPOWER** produces a dense foam which provides additional cleaning economy. **MEGAPOWER** does a great job on outdoor barbeque grills, both gas and charcoal.

DIRECTIONS

Turn off electrical power or extinguish pilot lights on range or oven. Affix trigger sprayer to the container as supplied. Spray product onto oven and grill surfaces at a distance of 12 inches. Allow **MEGAPOWER** to remain on warm oven surfaces for 5 to 10 minutes. While wearing gloves, wipe surfaces clean with a damp sponge or cleaning cloth. After removing **MEGAPOWER**, rinse cleaned surfaces with potable water to remove all remaining cleaner. Heavy encrustations may require an additional application.

CAS Numbers: Product contains liquid potassium hydroxide (1310-58-3), coconut oil diethanolamide (61789-19-3), phosphate ester (39454-62-1), and acrylic copolymer emulsion (N/A mixture).

CAUTION

Use caution. Avoid contact with skin, eyes, mucous membranes and clothing. Wear eye protection and chemical resistant gloves while using this product. Do not use on aluminum. Overexpose can cause severe eye and skin irritation. Do not spray into electrical connections. Do not spray onto asphalt tile, linoleum or painted surfaces. If this should occur, wipe immediately with a damp sponge and rinse thoroughly.

FIRST AID

IF IN EYES: Flush eyes with large quantities of clear, cool water. Seek medical attention if irritation persists.

IF ON SKIN: Remove contaminated clothing. Flush with large quantities of water. Seek medical attention if irritation persists.

IF INHALED: Get to fresh air. Seek medical attention if irritation persists.

IF SWALLOWED: Do not induce vomiting. Drink large amounts of water or milk to dilute in stomach. Seek immediate medical attention.
