

DESCRIPTION:

BLUE DISH WASH is a highly concentrated manual dishwashing liquid designed for all types of injection systems for direct feeding into the sink.

BLUE DISH WASH may also be added manually.

DIRECTIONS:

BLUE DISH WASH manual applications.

LIGHT SOIL: 1 OZ. BLUE DISH WASH to 8-10 Gallons of Water.

NORMAL SOIL: 1 OZ. BLUE DISH WASH to 2-4 Gallons of Water.

HEAVY SOIL: 1 OZ. BLUE DISH WASH to 1 Gallon of Water.

In this age of portion control, the proportioner is ideal to insure efficient dishwashing at the lowest cost.

The proportioner is an automatic pushbutton liquid controller and is designed to attach quickly to a faucet, draw product from the container and dispense it to a desired proportion with water. Dilutions as high as 1 oz. per 10-12 gallons of water. Turn on the faucet, clear water will flow until the button on the proportioner is pushed. When the faucet is turned off, the button will automatically snap to the off position, instantly cutting the flow of **BLUE DISH WASH**. The proportioner will stay off until the button is pushed.

CAS numbers: Contains Dodecyl benzene sulfonic acid (CAS No. 27176-87-0), Nonionic surfactant (CAS No. 9016-45-9), Sodium lauryl ether sulfate (CAS No. 68891-38-3), Cocoamphodipropionate (CAS No. 68604-71-7) and Sodium hydroxide (CAS No. 1310-73-2).
