

DISH-A-KLEEN is a viscous, mild, high foaming detergent composition designed for manual dish washing operations. It is designed to produce a stable foam system that not only emulsifies but also suspends greasy soils to prevent redeposition.

DISH-A-KLEEN is a powerful cleaning agent, but is mild to the hands. **DISH-A-KLEEN** is safe for use on fine decorative china, as well as silverware and delicate fabrics.

NOTE: Do not confuse **GMP's DISH-A-KLEEN** with other products that may look like or claim to be the same. There is only one **DISH-A-KLEEN** and with substitutes, product performance or user safety must be sacrificed.

DIRECTIONS

For heavy soiled pots, pans, and kitchen utensils: add 1 to 2 ounces of **DISH-A-KLEEN** per gallon of hot water used. Allow to soak for several minutes, agitate surface with brush or sponge, and rinse clean.

For soiled dishes and glassware: use ½ to 1 ounce per gallon of water.

For fine fabrics: use 1 ounce per gallon of lukewarm water.

CAS Numbers: Contain dodecyl benzene sulfonic acid (27176-87-0), sodium lauryl ether sulfate (68891-38-3), sodium hydroxide flake (1310-73-2), carbamide (57-13-6), and sodium chloride (7647-15-5).

CAUTION

Use caution. Keep container tightly closed when not in use. Do not store in areas where product may freeze. For industrial, commercial and institutional use only.

FIRST AID

IF IN EYES: Flush eyes with large quantities of clear, cool water. Seek medical attention if irritation persists.

IF ON SKIN: Remove contaminated clothing. Flush affected areas with water. Prolonged contact may cause dermatitis.

IF SWALLOWED: Drink large quantity of water. Seek medical attention immediately.
