

L.I.D. is a water soluble, liquid industrial deodorant that is non-staining and can be used for most odor problems. It neutralizes sulfur and nitrogen chemical odors by a chemical reaction.

DIRECTIONS

General Deodorizing: 1:60 with water. Apply with mop, sponge, sprayer or by emerging small articles. If possible, allow surface to dry without rinsing for maximum deodorizing action. Provides exceptional odor control in many areas including: garbage trucks, concrete floors, airplanes and buses, animal cages, packing plants, moldy air filters and carpets, hospital rooms, toilets and urinals.

Sewage Treatment Plants: Allow product to drip into incoming wastewater at the rate of 1 drop every 5 seconds. If odor still persists after 4 hours, increase dosage to 1 drop every 2 seconds. After odor is eliminated, cut back to 1 drop every 8 seconds. To remove odors around plant and grounds, dilute 1 part product with 30 parts water and spray concrete walls above the water line, walkways, ramps, grounds, etc. Also can be used in sump systems.

Cattle Pens and Stockyards: Spray ground and areas where odor persists with a solution of 1 part deodorant to 30 parts water. Initial treatment may have to be twice daily until odor is eliminated. Follow with treatment every other day to maintain odor free atmosphere. Cover all food and water before spraying. Remove cattle from area being treated.

CAS Numbers: Oxyphenoxypolyethoxyethanol (9036-19-5), Sorbitan Monolaurate (9005-64-5), Methyl-2, 4-pentanedio (107-41-5), propanol (67-63-0), Dipropylene Glycol Methyl Ether (34590-94-8), Water (7732-18-5)

CAUTION

Eye irritant. Avoid contact with eyes.
Container Disposal: Triple rinse container with water and dispose in an authorized landfill.

FIRST AID

IF IN EYES: Flush with water for 15 minutes. Get medical attention.

IF ON SKIN: Flush with water for 15 minutes. If irritation persists, seek medical attention.

IF INHALED: Remove to fresh air. If irritation persists, seek medical attention.

IF SWALLOWED: Do not induce vomiting. Drink 3 to 4 glasses of water or large quantity of milk, egg whites or gelatin solution. Get immediate medical attention.
