

HYDROSOLVE is a special formulation of detergents with super wetting agents to remove dirt, grime, blood, animal fats, etc., from all washable surfaces. This product emulsifies heavy soils on floors and fixtures, yet removes lipstick and most inks from painted woodwork, ceilings and walls.

HYDROSOLVE cleans all washable surfaces such as concrete, metal, plastic, glass, wood, porcelain, formica, enamel, marble, laminated surfaces, asphalt, tile, terrazzo, stainless steel, chrome, aluminum, vinyl, rubber, painted and lacquered surfaces.

HYDROSOLVE penetrates, emulsifies and suspends soils on floors, walls, ceilings, woodwork, fixtures, windows, doors, furniture, elevators, pools, vinyl linoleum, aircraft, trucks, vehicle interior and exterior surfaces.

DIRECTIONS

Heavy soils: Dilute 1 part **HYDROSOLVE** with 20-25 parts hot water and apply with a mop, sponge, or sprayer. Let solution remain on surface for several minutes to penetrate and dissolve soils, then rinse or hose off with clear water. For extremely heavy soil deposits, agitation with a brush or broom is recommended for best results.

Average Soils: Dilute 1 part **HYDROSOLVE** with 25-30 parts water and apply to area to be cleaned. Let solution remain on surface for several minutes before mopping or wiping clean.

Light Soils: Dilute 1 part **HYDROSOLVE** with 30-50 parts water and apply in a similar manner as for average soil.

CAS Numbers: Contains water (7732-18-5), trisodium phosphate (10101-89-0), sodium tripoly phosphate (7758-29-4), coconut oil diethanolamide (61789-19-3), tall oil fatty acid (68187-99-5), and 2-butoxyethanol (111-76-2).
