

ANTI CLOG is a biocide (quaternary ammonium) tablet enclosed in a plastic housing. Ultrasonically sealed to the housing is a white filter pad. Water is absorbed by the filter pad and “wicked” to the tablet. The release of powerful biocide is initiated as the water begins dissolving the tablet. The filter pad controls the release of biocide resulting in a 3-month service life in even the hottest and most humid climates.

ANTI CLOG works either horizontally or vertically at angles up to 60°, without compromising performance.

ANTI CLOG contains the highest amount of active biocide of any product on the market. It is the only product on the market permitted by the EPA to make a Legionnaire’s Disease Bacteria (LDB) kill claim. The filter pad meters a consistent biocide release for a 3-month service life and its safe to use, sealed, tamper-proof housing prevents contact with the biocide.

DIRECTIONS

For optimal performance, initially install **ANTI CLOG** during pre-season maintenance programs prior to system start-up. Follow-up maintenance would require replacement of **ANTI CLOG** every 3 months for the duration of the cooling season. Following this recommended usage program will protect buildings from drain pan overflow, resulting in costly flood damage and the spread of harmful bacteria bred in drain pans.

CAS Numbers: Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chloride (68391-01-5) and alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chloride (68956-79-6).

GENERAL MAINTENANCE PRODUCTS

Anti Clog

Air Conditioning and Refrigeration
Drain Pan Maintenance

- Control slime build-up and consequent drain pan overflows
- Controls harmful bacteria growth
- Controls musty odors introduced into air handling units from bacterial slime accumulations

ACTIVE INGREDIENTS: n-Alkyl (98% C12, 2% C14) Dimethyl 1-naphthylmethyl ammonium chloride monohydrate.....50%

INERT INGREDIENTS:.....50%

CAUTION: See side panel for precautionary information.

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS ¾ OZ UNIT (S)

CAUTION

Not for use in applications exceeding 150°F. Do not use in humidifiers, humidifier sections of air conditioning systems, or in evaporative coolers.

FIRST AID

IF IN EYES: Flush thoroughly with water for at least 15 minutes. Seek immediate medical attention.

IF ON SKIN: Wash exposed areas thoroughly with soap and water. If irritation persists, seek medical attention.

IF INHALED: Move person to fresh air. If irritation persists, seek medical attention.

IF SWALLOWED: Promptly drink large quantities of milk, egg whites, gelatin solution or water. Avoid alcohol. Do not induce vomiting. Seek medical attention.
