

L.S.C. is a highly specialized, citrus product formulated to be a fast-breaking emulsification system possessing degreasing and detergent properties which clean the vertical surfaces of lift station wet wells and similar treatment facilities. **L.S.C.** is added directly to lift station wet wells in its concentrated form for effortless cleaning. Cleaning and degreasing is accomplished by the rise and fall of the water level. As the water fluctuates, the cleaner removes the debris from the wet well sides. A secondary property of this unique product is its ability to seal, or contain, offensive odors, which emit from the lift station.

DIRECTIONS

L.S.C. should be added to wet wells until a layer of 8 to 12 inches is floating on the surface. This initial treatment should remain effective for a period of 3 to 6 months, depending upon system demands.

CAS Numbers: Contains Monocyclic Terpene (5989-27-5).

CAUTION
Combustible liquid. Use in a well ventilated area. Do not use or store near heat, sparks, open flames, or other sources of ignition. Harmful if swallowed. Do not ingest.

FIRST AID
IF IN EYES: Flush with water for 15 minutes. If irritation persists, get medical attention.
IF ON SKIN: Wash with soap and water for 15 minutes, if irritation develops.
IF INHALED: Remove to fresh air. If irritation develops, see a physician.
IF SWALLOWED: Do not induce vomiting. Drink large volumes of water or milk. Get immediate medical attention.
