

L.S.C. SUB is a highly specialized product formulated to be a fast-breaking emulsification system possessing degreasing and detergent properties which clean the vertical surfaces of lift station wet wells and similar treatment facilities. **L.S.C. SUB** is added directly to lift station wet wells in its concentrated form for effortless cleaning.

Cleaning and degreasing is accomplished by the rise and fall of the water level. As the water fluctuates, the cleaner removes the debris from the wet well sides. A secondary property of this unique product is its ability to seal, or contain, offensive odors, which emit from the lift station.

DIRECTIONS

L.S.C. SUB should be added to wet wells until a layer of 8 to 12 inches is floating on the surface. This initial treatment should remain effective for a period of 3 to 6 months, depending upon system demands.

CAS Numbers: Contains Soy Methyl Esters (67784-80-9).

C603

GENERAL MAINTENANCE PRODUCTS

L.S.C. SUB
Lift Station Cleaner and Deodorizer

- Cleans Station
- Degreases
- Reduces Odor
