

ELBOW GREASE is a carefully formulated, selective stripping agent. It takes the "elbow grease" out of the time consuming task of floor finish build-up removal.

ELBOW GREASE chemically dissolves and emulsifies old, oxidized, multi-coated layers of old wax build-up in a single application.

DIRECTIONS

Total Finish Removal: Thoroughly spray built-up area with **ELBOW GREASE**, as supplied. Wait 3 to 5 minutes for the product to penetrate and emulsify the old wax, finish, and dirt. Scrub the area with **GMP STRIPPING AID** and rinse with a solution of **NEUTRA KLEEN**. Do not use **ELBOW GREASE** on painted surfaces. If product contacts a painted surface, wipe off immediately with a damp sponge.

Partial Removal for Repair: Lightly spray **ELBOW GREASE** on the section of floor to be repaired. Run over the area with a high speed floor machine with the least abrasive pad necessary to do the job. Dust mop the area, rinse, recoat, and maintain.

Stubborn Black Mark Removal: Lightly spray marks and immediately wipe with a damp sponge, cloth, or mop. Rinse with a **NEUTRA KLEEN** solution.

CAS numbers: Contains 2-butoxyethanol (111-76-2), acrylic copolymer emulsion (N/A mixture), monoethanolamine (141-43-5), potassium hydroxide liquid (1310-58-3), sodium xylene sulfonate (1300-72-7) and sodium metasilicate pentahydrate (6834-92-0).

GENERAL MAINTENANCE PRODUCTS

CAUTION

Use caution. Product may etch aluminum and glass. Use only in well ventilated areas. Avoid contact with skin and eyes. The use of hand and eye protection are recommended while using this product.

FIRST AID

IF IN EYES: Flush eyes with large quantities of clear, cool water. Seek medical attention if irritation persists.

IF ON SKIN: Remove contaminated clothing. Flush with large quantities of water. Seek medical attention if irritation persists.

IF INHALED: Remove to fresh air.

IF SWALLOWED: Do not induce vomiting. Drink large amounts of water or milk to dilute in stomach. Seek medical attention immediately.

KEEP OUT OF REACH OF CHILDREN.
