

**ULTRA** is a water-based seal for use on Concrete, Terrazzo, Brick, Slate, Quarry and Resilient tile floors. Easy to apply and fast drying. The seal can be used over most solvent sealers. Recommended for synthetic sport floors.

#### DIRECTIONS

Surface should be cleaned of all dirt, grease, oil and old, badly worn seals. Scrub thoroughly and rinse completely. Allow floor to dry completely before applying seal. Etch the concrete if it is smooth.

Apply **ULTRA** with a lambs wool applicator or mop. Each coat should be applied evenly and in thin coats. Surfaces that have no sealers, apply 2-3 coats, depending on the porosity of the surface and desired gloss. Allow one hour between coats. Make sure the first coat is completely dry before applying a second coat. Final coat should be allowed to dry for 6-8 hours before heavy traffic is allowed on the floor.

On terrazzo, slate and quarry floors, it is recommended that this product be reduced 1 to 1 with water.

#### DO NOT USE ON CONCRETE THAT HAS NOT CURED.

To remove **ULTRA** from concrete, terrazzo, quarry or other similar surfaces, use a solvent-type or special water-based stripper. To remove from resilient floors or synthetic-type surfaces, use only a special water-based stripper. In all applications of the stripper, follow the manufacturer's directions and cautions.

#### GENERAL MAINTENANCE PRODUCTS

#### WARNING

CAS Numbers: Contains Glycol Ether (111-90-0), Dibutyl Phthalate (84-74-2) and Polymer (LO ODOR) (Not Applicable).

The balance of the chemicals in this mixture are either considered non-hazardous or are below the listing limits (1% for hazardous substances, 0.01% for special hazardous substances) under various State Right-To-Know Laws. These chemicals are considered trade secrets. The specific chemical identity of these chemicals is available to health professionals.

**FIRST AID:** Wash skin thoroughly with soap and water. Flush eyes with large amounts of cool water for at least 15 minutes. If breathing becomes a problem, remove to fresh air, administer oxygen if available and necessary. If ingested, **DO NOT INDUCE VOMITING**, get medical attention immediately.
