

BAC-MAN PLUS W/ASE digests, liquefies, loosens, and removes such organic wastes as complex fats, oils, greases, cellulose, proteins, and starches. Regular use virtually eliminates hand cleaning of grease traps. **BAC-MAN PLUS W/ASE** contains no dangerous acids or alkalis and is harmless to plumbing lines, fixtures, and septic tanks. **BAC-MAN PLUS W/ASE** instantly destroys all odors from sewage and plumbing and eliminates the source of odors. **BAC-MAN PLUS W/ASE** is totally free of pathogenic bacteria and each batch is thus certified. The most favorable time for use is at the end of the day's activities. The reason for this is to allow **BAC-MAN PLUS W/ASE** to develop maximum bacterial action while there is little use of the fixture or facility.

DIRECTIONS

FOOD SERVICE OPERATIONS: Treat grease traps first heavily before treating related plumbing to avoid overflow of the grease trap.

GREASE TRAPS: 1 liter/25 cubic feet directly into the trap. Repeat every 4 days until odors are gone.

SEPTIC TANKS: Use 1/2 liter weekly for every 12 people that use the system. (Can be used less frequently if visual inspection of the tank is satisfactory.)

TILE FIELDS: After tank has been treated, add 1 gallon directly to the distribution box; repeated treatment may be necessary.

BATH TUBS, SHOWERS, SINKS: 4 ounces weekly/drain.

TOILETS: 4 ounces/month per fixture.

URINALS: Initial dose is 1/2 liter; maintenance dosage is 4 ounces/week.

KITCHEN DRAINS: 4 ounces/week in each drain.

The addition of **BAC-MAN PLUS W/ASE** may be automated with the **GMP Pump Timer**.

CAS Numbers: Contains isobutane (75-28-5) and mineral oil (8042-47-5).

Shake well before using. Remove cap and hold the can upright, 6 to 8 inches from surface to be cleaned. Sparingly spray in a sweeping motion. Polish with a clean, dry cloth or paper towel.

PRECAUTIONS

Use Caution. Contains living, non-pathogenic bacterial cultures. Store in a cool, dry place. Keep from freezing. Avoid excessive inhalation.
CAS Numbers: Not assigned.

FIRST AID

EYES: Flush with clear, cool water for at least 15 minutes. Contact physician if irritation persists.

SKIN: Wash with warm, soapy water.

IF INHALED: Remove to fresh air.

IF SWALLOWED: Drink plenty of water or milk to dilute in stomach. Contact physician immediately.
