

DRIVE GUARD is a value packed blend of mineral aggregate and specially prepared asphalt. Ready-to-use from the bag, it affords quick and economical repair of chuckholes in any asphalt or concrete surface. **DRIVE GUARD** sticks to asphalt and concrete without a primer even in cool, wet weather.

DRIVE GUARD is of professional quality and is of the same material used by many State and Local highway departments and contractors. This product is all weather and can be used in wet or dry applications.

DIRECTIONS

SURFACE PREPARATION: Sweep chuckhole clean of all dirt, dust and debris. Remove loose pavement fragments from edges of area to be patched. Take care to keep vertical edges of chuckholes as clean as possible.

APPLICATION: Pour or shovel into chuckholes. Level material slightly higher than desired depth to allow for compaction. Compact with flat side of shovel, tamper or roller.

RESTRICTIONS: Do not use over mud or clay. Material works best over a solid base. Do not use where material, once applied, may come in contact with potable water. Exterior use only. Keep bag tightly sealed when not in use.

CAS NUMBERS: Contains asphalt petroleum binder (8052-42-4) and limestone (1317-65-3).

KEEP OUT OF REACH OF CHILDREN.

NET CONTENTS: 50 LB BAG

CAUTION

Causes eye irritation. Inhalation of vapors can be harmful to upper respiratory tract and central nervous system. Keep away from heat or flame. Wear eye and skin protection when handling. Avoid prolonged or repeated breathing of vapors, mists or fumes. Do not take internally. Observe good hygiene and safety practices when handling this product. Use only with adequate ventilation. Seal bag when not in use. For exterior use only.

FIRST AID

IF IN EYES: Flush with water for at least 15 minutes. Contact a physician.

IF ON SKIN: Wash with soap and water. Contact a physician if rash develops and persists.

IF INHALED: If affected, remove individual to fresh air. If breathing stops, give artificial respiration. Get medical attention.

IF SWALLOWED: Do not induce vomiting. Keep person warm and quiet. Contact a physician. Aspiration into the lungs due to vomiting can cause chemical pneumonitis, which can be fatal.
